Response to Amendment

1. Applicant's amendment received March 2nd, 2005 has been fully considered and entered, but the arguments are not deemed to be persuasive

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1, 21-22, 25-26, and 32 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al. (US Patent no. 6498810).

The applied reference has a common Assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding the above claims, the applicant argues that Kim does not teach or suggest computing two-dimensional prediction information and selecting prediction error information having a minimum bit rate from the computed prediction error information. The examiner respectfully disagrees. Such feature is clearly shown in fig. 6. In fact, claim 1 is fig. 6 as shown. In addition, col. 6, lines 10-25 gives details about the specific steps. Also note that the prior art is not referring to one-dimensional prediction error (See col. 2, lines 45-60).

The applicant further argues that the section of Kim referred to in the office action pertains to motion vector X using a minimum rate predictor and coding component Yin the similar way. The examiner reminds the applicant that while a section of the prior art referred to in the office action is not pertaining to a particular claim, the applicant is responsible to evaluate the prior art as a whole. In response to applicant argument, Kim discloses finding the difference between an actual motion vector and a predicted motion vector giving the error information in col. 6, lines 15-25. In addition, while finding the

and selecting a candidate which has a minimum difference from a motion vector out of neighboring vector candidates, the two-dimensional prediction error is found (See Kim col. 6, lines 28-34).

4. Claims 2-10, 23-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 11-20, 27-31, and 33 are allowed.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
